EDUCATION

University of California, Berkeley — **Berkeley, CA**
B.A. in Computer Science (GPA: 3.8/4.00) — Expected Graduation: May 2028
Relevant Coursework: Data Structures and Algorithms, Discrete Mathematics & Probability Theory, Structure & Interpretation of Computer Programs, Computer Architecture, Linear Algebra, Calculus I & II

EXPERIENCE

Sentient OS (YC F26) — **San Francisco, CA**
Software Development Intern — May 2026 – August 2026
- Owned the end-to-end **Windows port of Sentient OS**, migrating a **97% Swift/macOS-native** application and rebuilding platform-specific integrations across filesystem access, background services, and local inference
- Re-architected performance-critical application paths to improve overall **runtime efficiency by 93%**, while building and debugging the Windows stack across UI, **LLM inference**, system APIs, persistence, packaging, and background execution

Visa — **Remote**
Software Engineer Intern — January 2026 – May 2026
- Designed and deployed cloud-based **microservices** and **REST APIs** supporting Visa's risk and product organizations, reducing manual case verification time by **95%** and scaling to thousands of daily transactions
- Architected an **LLM-driven** document generation pipeline serving **1,600+** annual client implementations, adding caching layers that improved accuracy by **31%** and cut onboarding timelines by **45%**

Mercor — **San Francisco, CA**
Software Engineer — August 2025 – January 2026
- Shipped a config-driven **LLM evaluation pipeline** as a **FastAPI** service spanning **6** frontier models, replacing **15 min/record** serial grading with multi-key rotation and per-key **asyncio** semaphores to clear **700** runs in **6 hours**
- Engineered multi-provider **LLM orchestration** on **AWS ECS** with a **Redis**-backed distributed semaphore governing **200** concurrent calls, plus **MongoDB** and **SHA-256** content-hash caches that cut repeat processing by **87%**

Children's Hospital of Philadelphia — **Philadelphia, PA**
Data Science Intern — June 2024 – August 2025
- Rewrote the pairwise-similarity engine of an alignment-free **recombination detection** tool, replacing an **O(N^2)** **NumPy** loop with a sparse **SciPy** matrix product that cut runtime **7,200s to 263s (27x)** over **2.44M** genomes
- Authored a **903-line** changepoint module segmenting N x N Jaccard matrices via **ruptures** BottomUp/L2 under a data-adaptive **BIC** penalty, adding **KDTree** k-NN pruning and vectorized **Mann-Whitney U** tests for **50x** faster scoring

Cornell University — **Remote**
Machine Learning Engineer Intern — September 2023 – May 2024
- Implemented **YOLO**-based object detection and multi-object tracking pipelines deployed on **Linux** servers, processing **500+** hours of real-world footage at **85%+** accuracy with multi-threaded inference optimization

PROJECTS

Isokra | Site | *TypeScript, Node.js, PostgreSQL, Docker, Agentic State Machines, Streaming STT/TTS* — **Co-Founder**
- Architected a production **AI interview runtime** with decoupled interviewer, grader, verifier, deterministic case engine, and orchestration state machine; built a **257-question** bank with **318 adversarial test cases**
- Built an LLM eval/regression pipeline with **10,747 unit tests** and **44/44 E2E tests**; achieved **97%** error detection, cut adversarial failures from **57% to 28%**, and won **16/16** head-to-head evals

RedCarpet | Github | *Python, Snakemake, LMDB, SciPy, Multiprocessing* — **First Author**
- Shipped a **pip/conda**-installable CLI that orchestrates a five-stage **Snakemake** DAG over a **26 GB** sharded **LMDB** key-value store, fanned out across a **multiprocessing** worker pool and covered by **64** tests

SKILLS

Languages: Python, Go, C/C++, Java, TypeScript/JavaScript, Rust, SQL, MATLAB, Bash, HTML/CSS
Infrastructure: AWS (ECS, EC2, S3), GCP, Docker, Kubernetes, Firebase, Linux, PostgreSQL, MongoDB, Redis
Backend & AI/ML: FastAPI, Flask, Django, Node.js, Celery, PyTorch, TensorFlow, Scikit-Learn, OpenCV, LangChain

ACHIEVEMENTS

Finalist in Ramp's Builders Cup Hackathon; **3 conference publications** (IBANGS; Janelia Research Campus, HHMI; ISSSI); **Semi-finalist (~Top 10%)** USA Biology Olympiad; **1st Place**, 76th Delaware Valley Science Fair; **2nd Place BPA National** in Digital Communication, IT Concepts, Healthcare Administration; **1540** SAT
